EARTHQUAKE ENGINEERING AND STRUCTURAL DYNAMICS

Issue No. 1, JANUARY

ANNOUNCEMENT iii

Earthquake-induced interaction between adjacent reinforced concrete structures with non-equal heights: C. G. Karayannis and M. J. Favvata 1

Identification of structural and soil properties from vibration tests of the Hualien containment model: J. E. Luco and F. C. P. de Barros 21

Simplified non-linear seismic analysis of infilled reinforced concrete frames: M. Dolšek and P. Fajfar 49

Optimum design of structures against earthquake by wavelet neural network and filter banks: E. Salajegheh and A. Heidari 67

Incorporating low-cycle fatigue model into duration-dependent inelastic design spectra: Y. H. Chai 83

DISCUSSION OF PAPER
An improved capacity spectrum method for ATC-40 by Y.-Y. Lin and K.-C. Chang: A. K. Chopra 97

AUTHOR'S REPLY 98

BOOKS RECEIVED 99

Issue No. 2, FEBRUARY

Seismic behavior of asymmetric RC wall buildings: Principles and new deformation-based design method: A. Sommer and H. Bachmann 101

Design of multiple tuned mass dampers by using a numerical optimizer: N. Hoang and P. Warnitchai 125

Scaling of spectral d' ,placement ordinates with damping ratios: J. J. Bommer and R. Mendis 145

Model updating using noisy response measurements without knowledge of the input spectrum: K.-V. Yuen and L. S. Katafygiotis 167

Scaling of strength reduction factors for degrading elasto-plastic oscillators: A. Chakraborti and V. K. Gupta 189

Indexed or abstracted by American Geological Institute; Applied Mechanics Reviews; Applied Science & Technology Abstracts (H. W. Wilson); Cambridge Scientific Abstracts; Current Contents®/Engineering, Computing & Technology (ISI); Earthquake Engineering Abstracts (NISEE); Ei COMPENDEX PLUS; Ei Page One; Environment Abstracts (CIS); Fluidex (Elsevier); GeoArchive (Geosystems); Geobase (Elsevier); Geological Abstracts (Elsevier); GeoRef; GeoSEARCH (Geosystems); Geotechnical Abstracts (Geotext Services); Geotitles: Geoarchaeology (Geosystems); Groundwater & Soil Contamination Database; Indian Society of Earthquake Technology Bulletin; International Bibliographies of Periodical Literature (IBR & IBZ); International Civil Engineering Abstracts (Anbar); International Petroleum Abstracts; ISI Alerting Services; Mechanics; Science Citation Index Expanded (also known as SciSearch®) (ISI); Science Citation Index® (ISI); Shock & Vibration Digest (Sage).

Issue No. 3, MARCH

Probabilistic approach for active control of structures: Experimental verification: J.-S. Hwang, K.-W. Min, S.-H. Lee and H. Kim 207

Seismic base-isolation by use of a telescoping stepping mechanism: M. D. Martinez-Rodrigo and J. E. Luco 227

Non-linear behavior of mass concrete in three-dimensional problems using a smeared crack approach: H. Mirzabozorg and M. Ghaemian 247

Modified predictor–corrector numerical scheme for real-time pseudo dynamic tests using state-space formulation: Y. Zhang, R. Sause, J. M. Ricles and C. J. Naito 271

Multi-objective optimization for performance-based seismic design of steel moment frame structures: M. Liu, S. A. Burns and Y. K. Wen 289

Damage detection of base-isolated buildings using multi-input multi-output sub-space identification: R. Yoshimoto, A. Mita and K. Okada 307

Issue No. 4–5, 10–25 APRIL

Special Issue on Earthquake Engineering for Transportation Structures
Guest Editor: Joseph Penzien

Foreword: J. Penzien 325

Seismic design of bridges accounting for spatial variability of ground motion: A. Lupoi, P. Franchin, P. E. Pinto and G. Monti 327

Performance-based seismic analysis and design of suspension bridges: S. Arzoumanidis, A. Shama and F. Ostadan 349

Proof testing in support of the new San Francisco–Oakland Bay Bridge: F. Seible, A. Dazio and J. I. Restrepo 369

Performance evaluation of shear links and orthotropic bridge deck panels for the new San Francisco–Oakland Bay Bridge: C.-M. Uang, F. Seible, C. McDaniel and C.-C. Chou 393

Simple algorithm for semi-active seismic response control of cable-stayed bridges: H. Iemura and M. H. Pradano 409

Evaluation of dynamic response characteristics of seismically isolated bridges in Chile: M. Sarrazin, O. Moroni and J. M. Roesset 425

Caltrans structural control for bridges in high-seismic zones: J. E. Roberts 449

A seismic upgrading method for steel arch bridges using buckling-restrained braces: T. Usami, Z. Lu and H. Ge 471

Supplemental system retrofit considerations for braced steel bridge piers: J. W. Berman and M. Bruneau 497

Seismic retrofit of George Massey Tunnel: P. R. Taylor, H. H. Ibrahim and D. Yang 519

Issue No. 6, MAY

Identification of structural parameters of multistorey shear buildings from modal data: S. Chakraverty 543

Algorithms for time synchronization of wireless structural monitoring sensors: Y. Lei, A. S. Kiremidjian, K. Krishnan Nair, J. P. Lynch and K. H. Law 555

A simple LMS-based approach to the structural health monitoring benchmark problem: J. G. Chase, K. L. Hwang, L. R. Barroso and J. B. Mander 575

Non-linear viscoelastic modelling of earthquake-induced structural pounding: R. Jankowski 595

Influence of construction deficiencies on the seismic response of structures: S. L. Dimova and P. Negro 613

The effective number of cycles of earthquake ground motion: J. Hancock and J. J. Bommer 637

Multi-objective framework for structural model identification: Y. Haralampidis, C. Papadimitriou and M. Pavlidou 665

Bond-graph based substructuring of dynamical systems: P. J. Gawthrop, M. I. Wallace and D. J. Wagg 687

Issue No. 7, JUNE

Stability and accuracy analysis of central difference method for real-time sub-structure testing: B. Wu, H. Bao, J.-P. Ou and S. Tian 705

An investigation of tuned liquid dampers equipped with damping screens under 2D excitation: M. J. Tait, A. A. El Damatty and N. Isyumov 719

Forced vibration testing of buildings using the linear shaker seismic simulation (LSSS) testing method: E. Yu, D. H. Whang, J. P. Conte, J. P. Stewart and J. W. Wallace 737

Active sensing using impedance-based ARX models and extreme value statistics for damage detection: T. R. Fasel, H. Sohn, G. Park and C. R. Farrar 763

A reassessment of dynamic characteristics of the Quincy Bayview Bridge using output-only identification techniques: B. A. Pridham and J. C. Wilson 787

Modal model identification of structures under unmeasured seismic excitations: V. Sepe, D. Capecchi and M. De Angelis 807

Seismic response of linear and non-linear asymmetric systems with non-linear fluid viscous dampers: R. K. Goel 825

On tuned mass dampers for reducing the seismic response of structures: J. C. Miranda 847

Issue No. 8, 10 JULY

Obituary for Thomas Kirk Caughey 867

Online test using displacement-force mixed control: P. Pan, M. Nakashima and H. Tomofuji 869

Optimal design of supplemental viscous dampers for irregular shear-frames in the presence of yielding: O. Lavan and R. Levy 889

LMS-based structural health monitoring of a non-linear rocking structure: J. G. Chase, H. A. Spieth, C. F. Blome and J. B. Mander 909

On the inelastic torsional response of single-storey structures under bi-axial excitation: I. Peruš and P. Fajfar 931

On the inelastic seismic response of asymmetric buildings under bi-axial excitation: D. Marušić and P. Fajfar 943

Semi-active control of sliding isolated bridges using MR dampers: an experimental and numerical study: S. S. Sahasrabudhe and S. Nagarajaiah 965

Analysis of tubular steel bridge piers: T. Ishizawa and M. Iura 985

A comparative study of concentrated plasticity models in dynamic analysis of building structures: M. A. Dides and J. C. De la Llera 1005

Issue No. 9, 25 JULY

Experimental evaluation of piecewise exact solution for predicting seismic responses of spherical sliding type isolated structures: C. S. Tsai, T.-C. Chiang and B.-J. Chen... 1027

Peak displacement demand of small to moderate magnitude earthquakes in stable continental regions: N. Lam and A. Chandler 1047

New approaches for non-classically damped system eigenanalysis: K. Khanlari and M. Ghafory-Ashtiany 1073

Torsional balance of plan-asymmetric structures with frictional dampers: analytical results: J. C. De la Llera, J. L. Almazan and I. J. Vial 1089

Simulation of the damage to a simple RC structure in Bhuj, India, earthquake to estimate the level of input-motion: L. Sunuwar, M. B. Karkee and C. Cuadra 1109

Time-domain response of linear hysteretic systems to deterministic and random excitations: G. Muscolino, A. Palmeri and F. Ricciardelli 1129

Dynamic model updating using combined genetic-eigensensitivity algorithm and application in seismic response prediction: Y. Lu and Z. Tu 1149

Control issues relating to real-time substructuring experiments using a shaking table: S. A. Neild, D. P. Stoten, D. Drury and D. J. Wagg 1171

Issue No. 10, AUGUST

A vector-valued ground motion intensity measure consisting of spectral acceleration and epsilon: J. W. Baker and C. A. Cornell 1193

Pseudo-dynamic seismic response of reinforced concrete frames infilled with non-structural brick masonry: F. Colangelo 1219

Seismic response analysis of multidrum classical columns: D. Konstantinidis and N. Makris 1243

Simplified design procedure for frame buildings with viscoelastic or elastomeric structural dampers: K.-S. Lee, C.-P. Fan, R. Sause and J. Ricles 1271

Damage identification method using harmonic excitation force considering both modelling and measurement errors: A. Furukawa, J. Kiyono, H. Iemura and H. Otsuka .. 1285

A fuzzy–random analysis model for seismic performance of framed structures incorporating structural and non-structural damage: X. Gu and Y. Lu 1305

Statistical significance of modal parameters of bridge systems identified from strong motion data: Y. Arici and K. M. Mosalam 1323

SHORT COMMUNICATION
Criteria for initiation of motion of rigid bodies to base excitation: C. C. Tung 1343

BOOKS RECEIVED 1351

Issue No. 11, SEPTEMBER

Influence of earthquake spatial variability on differential soil displacements and SDF system response: C. Nuti and I. Vanzi 1353

Effect of soil interaction on the performance of liquid column dampers for seismic applications: A. Ghosh and B. Basu 1375

A practical method for estimating dynamic soil stiffness on surface of multi-layered soil: N. Nakamura 1391

Online hybrid test by internet linkage of distributed test-analysis domains: P. Pan, M. Tada and M. Nakashima 1407

Evaluation of damping reduction factors for estimating elastic response of structures with high damping: Y.-Y. Lin, E. Miranda and K.-C. Chang 1427

BOOKS RECEIVED 1445

ANNOUNCEMENT i

Issue No. 12, OCTOBER

Inelastic torsion of multistorey buildings under earthquake excitations: K. G. Stathopoulos and S. A. Anagnostopoulos 1449

Dynamic centrifuge tests of concrete dam: Y. Uchita, T. Shimpo and V. Saouma 1467

Hysteretic models that incorporate strength and stiffness deterioration: L. F. Ibarra, R. A. Medina and H. Krawinkler 1489

In situ experiments and seismic analysis of existing buildings. Part I: experimental investigations: S. Hans, C. Boutin, E. Ibraim and P. Roussillon 1513

In situ experiments and seismic analysis of existing buildings. Part II: Seismic integrity threshold: C. Boutin, S. Hans, E. Ibraim and P. Roussillon 1531

Books Received 1547

Issue No. 13, 10 NOVEMBER

Effect of peak ground velocity on deformation demands for SDOF systems: S. Akkar and Ö. Özen 1551

Developing efficient scalar and vector intensity measures for IDA capacity estimation by incorporating elastic spectral shape information: D. Vamvatsikos and C. A. Cornell 1573

Evolutionary aseismic design and retrofit of structures with passive energy dissipation: G. F. Dargush and R. S. Sant 1601

Design formulations for supplemental viscous dampers to highway bridges: J.-S. Hwang and Y.-S. Tseng 1627

Non-ergodicity and PEER's framework formula: A. D. Kiureghian 1643

Issue No. 14, 25 NOVEMBER

The impact of epistemic uncertainty on an earthquake loss model: H. Crowley, J. J. Bommer, R. Pinho and J. Bird 1653

Shaking table tests on reinforced concrete frames without and with passive control systems: M. Dolce, D. Cardone, F. C. Ponzo and C. Valente 1687

Seismic demand sensitivity of reinforced concrete shear-wall building using FOSM method: T.-H. Lee and K. M. Mosalam 1719

A probabilistic approach for estimating the seismic response of elasto-plastic SDOF systems: A. D'Ambrisi and M. Mezzi 1737

Issue No. 15, DECEMBER

Substructural first- and second-order model identification for structural damage assessment: K. F. Tee, C. G. Koh and S. T. Quek 1755

Effect of variation of normal force on seismic performance of resilient sliding isolation systems in highway bridges: H. Iemura, T. Taghikhany, Y. Takahashi and S. K. Jain 1777

Estimate of input energy for elasto-plastic SDOF systems during earthquakes based on discrete wavelet coefficients: J. Iyama 1799

Stability analysis of real-time dynamic substructuring using delay differential equation models: M. I. Wallace, J. Sieber, S. A. Neild, D. J. Wagg and B. Krauskopf.... 1817

SHORT COMMUNICATION

Shaking table test of reinforced concrete wide beam–column connections A. Benavent-climent 1833
